THE QUÉBEC CITY CONVENTION CENTRE GETS LEED-EB CERTIFICATION

Just a few days after receiving the AIPC Quality Standard certification, the Québec City Convention Centre receives LEED-EB certification, given by the U.S. Green Building Council (USGBC). It is the first Canadian convention centre to receive LEED certification for an Existing Building.

“Our team has been working very hard to receive LEED-EB certification. We are all very proud to have obtained the silver level,” said Mr. P.-Michel Bouchard, CEO at the Convention Centre. It confirms to clients and delegates that we offer a highly comfortable facility operated according to strict environmental standards.”

“The Québec City Convention Centre’s LEED certification demonstrates tremendous green building leadership,” said Rick Fedrizzi, President, CEO & Founding Chair, U.S. Green Building Council. “The urgency of USGBC’s mission has challenged the industry to move faster and reach further than ever before, and the Québec City Convention Centre serves as a prime example with just how much we can accomplish.”
